

Bulk Upload Tutorial

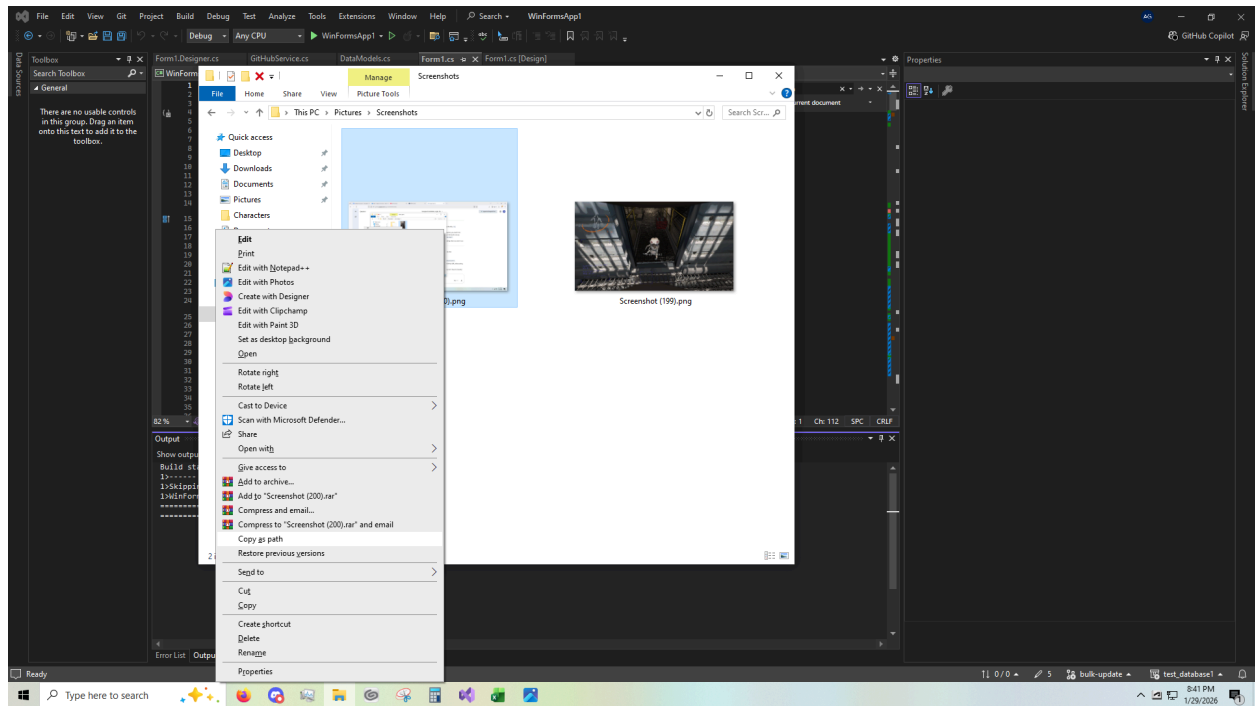

General Rules

- File Format: Always save the file as a .csv.
- The correct answer must always be placed in the Opt1_Text column. The game is programmed to treat the first option as the correct one.
- Export as a .csv file. You can keep all questions in the .csv file as the program will pass over questions that already exist in the database json file.
- Questions with images may take longer to upload, please wait until receiving the message dialog box signifying that the bulk upload was successful.

CSV Columns

Question	The text the player will see.
QuestionImage	Leave blank unless you have a direct URL to an image.*
Opt1_Text	This is always the correct answer.
Opt2 - Opt5	Enter the wrong answers here. If you only want 4 total options, leave Opt5_Text empty.
Difficulty	Enter a number from 1 (Easiest) to 5 (Hardest).
Minigame	Must be one of these: None, Card Match, Whack-a-Mole, or Slapjack.
Module	Use a number from 0 to 4 based on the module.
BodyLocations	Use the names below. If using multiple, separate them with a comma.

*How to get a direct URL to an image on your local device:

Select the image you want to use, hold shift + right click on the image. Select 'Copy Path' and paste into the .csv cell.

Valid Body Location Names

When filling out the BodyLocations column, use these exact names:

- Bladder
- Brain
- Eyes
- GI Tract
- Heart
- Lungs
- Smooth Muscle
- Other

Example: Heart, Lungs

Example: Smooth Muscle
